English, Tamil

Banking Project (AHP/SetAside) – (4 Banks) (April 2016 - Nov-2018)

Type: Client Project

Team size: 3-4

Sub Projects: XSS implementation, Data Migration,
Product Development, Product Support

- Was working as a key resource for a Banking project involving complex transaction management utilizing Agile Methodology
- Have experience working on Oracle 12c BI Publisher reports.
- We were imposing VPD policies based on client requirements.
- Involved on applying XSS policy on the application
- Involved on migrating legacy data from data dump
- Involved in upgrading Apex to 5.1.4
- Working on same code base for 4 banks so each change has to be handled appropriately
- I have also been part of the deployment team by promoting the tag deployment until UAT.

Online employee Portal – Internal Project (Oct 2015 - Mar 2016)

Type: Internal project

Team Size: 2

- Was allowed to build an online Employee portal for the organization. Developed the application from scratch using Oracle APEX as a tool and PL/SQL as a language.
- Was exposed to highly challenging requirements, which was helpful in molding myself on the domain
- Completed “**Oracle Application Express Developer Certified Expert**” while working on an internal project and entitled as **APEX** developer.

Training Period: (July – September, 2015)

- Was given hands on training on **Core Java, Spring framework, Hibernate.**
- Given hands on training on SQL, Oracle PL/SQL and Oracle APEX
- During training, we were given a trainee sandbox containing the code base of project and were asked to solve real time problem
